*Index tests include all tests reported to the NCSP except those identified as partners/contacts.

§ Laboratory reports of chlamydia tests include screening tests, diagnostic tests and contacts and include records where sex is male, female, and unknown/not specified. Age range: 15-24 years.

† Source: Mid 2006 ONS population estimates.

**Cell sizes of 1 to 4 and corresponding totals have been masked to protect deductive disclosure in accordance with ONS guidelines.

Footnotes:

1. NCSP returns as of 09.11.09 and non NCSP non GUM returns as of 10.12.09. These data may not reflect all screens/tests performed. Data includes tests where sex is male, female, and unknown/unspecified.
2. Data presented is number of tests and not number of people tested. Please note that number of tests as collected through the NCSP programme will be used as a proxy for the number of people tested.
3. Data presented is based on tests with confirmed positive and negative results only. Tests with equivocal, inhibitory and insufficient results have been excluded as most people with these results are retested.
4. Not all laboratories have provided non NCSP non GUM data by Local Authority, therefore, total number of non NCSP non GUM tests by LA may differ from total number of non NCSP non GUM tests by PCT.
5. NCSP tests may differ from data presented in PCT tables if postcodes could not be mapped to a Local Authority.
6. Data presented in the new Local Authority structure. Re-structure took effect on 01.04.09.
