

## National Chlamydia Screening Programme

### NHS Vital Signs 2010/11

#### Primary Care Trust (PCT) and Strategic Health Authority (SHA) specific tables

1st April 2010 to 31st March 2011

---

#### Chlamydia Vital Signs denominator data 2009/10:

Population data for 2010/11 are derived from the 2006-based ONS population projections for 2010.

#### Notes on using these tables:

Chlamydia tests reported to the NCSP are based on young people aged between 15 and 24 years and includes tests where sex is male, female, and unknown/unspecified. Data is as of 17/05/2011 and includes tests where sex is male, female, and unknown/unspecified. These data may not reflect all screens/tests performed.

Data include all tests - screening tests, diagnostic tests and contacts and are presented by PCT of residence or "attributed" PCT of residence. "Attributed" PCT of residence is assigned for the NCSP return once data are received nationally. Postcode of clinic is used to assign PCT of residence if a patient has not provided a valid postcode of residence.

Data are number of tests and not number of people tested. Please note that number of tests will be used as a proxy for the number of people tested.

Data presented are based on tests with confirmed positive and negative results only. Tests with equivocal, inhibitory and insufficient results have been excluded as most people with these results are retested.

**Please note that as of 1<sup>st</sup> April 2008 partners/contacts reported to the NCSP via the quarterly disaggregate dataset will count towards the Vital Signs indicator target.** Be aware partners/contacts reported via the six monthly aggregate dataset will not count towards these figures.

#### Data Sources

English National Chlamydia Screening Programme (NCSP)

#### Further information:

Technical Descriptions for Plans Updated for 09/10 (VSB 13: Chlamydia Prevalence (Screening)). Included in the National Indicator Set: NI 113

NCSP - See Core Requirements (Fourth Edition) January 2008

Footnotes:

1. Data as of 17/05/2011 and may not reflect all screens/tests performed. Data include screening tests, diagnostic tests and contacts and include records where sex is male, female, and unknown/not specified. Age range: 15-24 years.
2. Data presented are number of tests and not number of people tested. Please note that number of tests will be used as a proxy for the number of people tested.
3. Data presented are based on tests with confirmed positive and negative results only. Tests with equivocal, inhibitory and insufficient results have been excluded as most people with these results are retested.
4. The percent of young people testing positive maybe higher than previously reported since the percent positive is now based on screening tests, diagnostic tests and contacts.
5. England total excludes those resident outside of England
